Fund Factsheet as at 30 April 2026

Brickwood

— ASSET MANAGEMENT —

Fund Objective and Investment Policy

The investment objective of the Fund is to outperform its benchmark, the FTSE All Share Index, net of fees, over the long term (a rolling 5-year period).

Capital is at risk. There is no certainty or promise that the Fund will achieve the target over a 5-year rolling period or any other period.

The Fund aims to achieve the investment objective by investing at least 80% in shares of UK companies (defined as companies which are domiciled, incorporated or have a significant portion of their business in the UK), of which at least 80% will be in the constituents of the FTSE 350.

Synthetic Risk Reward Indicator (SRRI): The SRRI is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'. The price of units/shares and any income from them may fall as well as rise and investors may not get back the full amount invested. Please refer to the KIID for further information.

Key Risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- Past performance is not a reliable guide to future performance.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The value of an investment may be affected favourably or unfavourably by fluctuations in exchange rates, notwithstanding any efforts made to hedge such fluctuations.
- Significant exposure to a particular industrial sector or geographical region puts a Fund at risk of a localised event making a significant impact to the value of the Fund.
- A concentrated portfolio (whether by number of holdings, geographic location or sector) may be more volatile and less liquid than a diversified one.

*The Ongoing Charges Figure (OCF) represents the total annual cost of running a fund. It is made up of the **Annual Management Charge (AMC), which is the annual fee expressed as a percentage and paid to the investment manager for overseeing the fund, and the ongoing cost, which combines the AMC with other operational expenses. These additional expenses cover services such as auditors, trustees, and valuers, and are indicative figures that are reviewed regularly and may change. The OCF does not include fund transaction costs, except where entry or exit charges are payable when the fund invests in or redeems shares of another collective investment scheme.
